3. Project Design Phase
3.1 Problem–Solution Fit

Project Name: Auto Ticket Classification Using Flow Designer

Team Leader: V. Veeranandhini
Members: S. Kanaga Vellammal, M. Yamuna, M. Sugapriya

S.No	Section	Our Project
1	Customer Segment	ServiceNow users, support agents and IT support teams
2	Problems / Pains	Manual ticket classification, incorrect assignment and timeconsuming ticket handling
3	Triggers to Act	A new incident/ticket is created and needs classification and assignment
4	Emotions – Before	Time-consuming, repetitive work and concern about incorrect assignment
5	Emotions – After	Faster processing, reduced manual work and better ticket management
6	Available Solutions	Manual classification and automated Flow Designerbased classification
7	Customer Limitations	Limited time and predefined assignment groups
8	Customer Behavior	Create ticket, check details, classify and assign ticket
9	Problem Root Cause	Manual ticket classification and assignment process

10	Proposed Solution	Use Flow Designer to automatically classify tickets based on predefined conditions and assign them to the appropriate assignment group
